**Date Shipment Vegetables
Changed to Sept. 29 and
Oct. 1, Weather Permitting**

Liberals Win Your Vote

Five Ontario Seats

TOBACCO, Sept. 25.—Four Liberals new to Parliament and a veteran member have been elected to five seats in the House of Commons in the Ontario re-election Monday.

The Liberals, who have been in power for nearly a year, have won the Liberal re-election sent the Liberal Party to power in the province.

The shipment of vegetables to southern Ontario has been postponed on account of bad weather, but plans are going ahead and, says a spokesman, are well loaded for Saturday and Sunday, September 26 and 27.

For the past few days, the vegetable shippers have been in touch with their local committees. Vegetables will be loaded from the beginning of the week, and the shippers say that the vegetables of any kind in sacks will be able to ship in the sack when the vegetables are dumped in the cars.

The weather has been disappointing and the shippers are not getting vegetables dry. It should be possible to get the vegetables dry by next week, and your efforts will be appreciated. The money in the market is not very good.

contents in ridings scattered over the province found the followers of the Rt. Hon. W. L. Mackenzie King still in favor with the electors.

Two of the Liberal victories were in former Conservative seats—Frontenac-Addington and York North. The other two—Elgin West and Kenora-Rainy

REARER LOOKS, Nov. 25. —Owing to the continued bad weather in this district during the past two weeks, very little has been done in connection with the shipping of the car of vegetables to the drought-stricken areas on the south. Until a couple of days ago most of the vegetables were still in

Figures not available yet on other seats.

Party standings in the House of Commons, based on the four Liberal seats.

With the improvement in the weather in the last couple of days, everyone has been busy getting the ground, which was in no shape for digging, and some damage was suffered by the heavy frost here recently which had a tendency to render the soil of vegetables available for shipment.

With the improvement in the weather in the last couple of days everyone has been busy getting the ground, which was in no shape for digging, and some damage was suffered by the heavy frost here recently which had a tendency to render the soil of vegetables available for shipment.

Victories and one Conservative win in Monday's bye-elections are: Conservatives, 135; Liberal, 92; United Farmers, 10; Labor, 4; Independents, 2; Progressives, 1; vacant, 1. Total, 245. The vacant seat is that of Halifax, caused by the death of Hon. W. A. Black, Conservative.

Mrs. P. B. Ramsay Passes Suddenly At Chiliwack

visiting P. K. H. Ramay, who was majoring his son, Peter, in the East End, received the distressing news that his wife had passed away suddenly on Monday last. Major Ramay left for Chillywack on Tuesday night's train.

The cause of death was hemorrhage of the brain.

World Looks To Dominion Wheat Crop

Rabson Says Wheat Market Outlook Best in Years

RABSON PARK, Mass., Sept. 26.—The eyes of all wheat buyers, during the next few weeks, will be turned to the Dominion of Canada, where the crop is expected to be the best in years. The Dominion's total exports, providing a livelihood for one-third of the total population, and having a direct bearing on the finances of the federal government through its ownership of a large carry-over, would affect nearly every aspect of the country's prosperity.

CANADA BENEFITS FROM WORLD WHEAT SHORTAGE
Although early estimates of Dominion wheat output ran high, July and August were not so good. The western areas. The same districts had been so hard hit in previous years that the situation there in these sections. Unofficial estimates for the wheat harvest are now ranging from only 250,000,000 bushels to 275,000,000 bushels. Normally Canada exports to the Dominion use about 100,000,000 bushels

per year. Hence, the wheat supply available for export this year, including the carry-over, will be about 357,000,000 bushels—slightly less than last year's period. Canada occupies a strategic position in the world crop market at present. Only two with a surplus of wheat available for export. It is estimated that the European harvest, outside of Russia, will be about 100,000,000 bushels less than last year's. Thus Canada will probably export about 250,000,000 bushels this season. This is the most promising outlook in years, especially for the Dominion, which has been the main wheat agreement between the present abnormal conditions developed in the world. Last year's export figures totaled 180,000,000 bushels.

Already Canada is benefiting from the short crops south of the border. Not only is the United States out of the running as an exporter of wheat and other grains, but she is being forced to import for her own consumption. Within the past few weeks, wheat has crossed the border to the north, and the price of "Durum" wheat has risen to a high point in the history of the Dominion. Moreover, there is a shortage of feed in the states, and millions of dollars worth of hay, oats, and other fodder must be brought in from Canada.

Accordingly, what ordinarily would have been a poor crop year in the Dominion is a favorable one for Canada. A favorable reduction of carry-over totals is in sight, which will bring further advances in prices during the next year. Current estimates of 50 cents per bushel are only slightly below the high for the year. The crop compares with a recent 70 cents last September and 50 cents in 1932. The price in London in December, 1932, on the basis of the price rise, the total farm income will be considerably higher this year.

CANADIAN FARMER CHIEF GAINERS IN 1934
Early products output and exports have been sustained at favorable levels to date. Although prices have not reached unusually high levels, the trend is definitely upward. Over the past year, quotations for farm products have advanced 15%, and are now the highest since 1931. Moreover, the increase in farm income means an increase in farmers' purchasing power. The articles in the articles have advanced 10%, thus the farmer's standard of living has been improved. In the States the income of the manufacturing under the NRA has been off to a large extent the increase in purchasing power as a result of the drought and government efforts.

Naturally the drought is hard on the farmers whose crops have been ruined. Drought conditions have been chronic in large areas of the prairie and in the North. But for the past six years in northern Saskatchewan, Manitoba and Alberta have worked hard. The government has planned to move about 45,000 families out of the stricken areas into the North. For those remaining, steps will be taken to reforest the land and, in the meantime, feed will be transported by the railways at two-thirds the normal rate. Further help for the farmer has been secured in recent months through the passage of the National Producers Marketing Act, the Farmers' Creditors Arrangement Act, and the amendment to the Canadian Farm Loan Act. These three Acts may be called Canada's "New Deal" legislation.

WHAT ABOUT INFLATION?
To help finance its various relief measures the government is taking advantage of its power over the money market. Last season's amendment to the Dominion Notes Act by leaving some \$20,000,000 of currency against 25% gold surplus. Immediately whippersawyer's mind there is probably some question as to what action the government might take against inflation? "Inflation" is so far very moderate, I may well answer with question as I have seen by my readers in the states. "Buy a small house this land as the government is through with the water family of spiritually-minded, healthy, industrious, and intelligent children. Studies of the course of radical inflation in European countries show beyond doubt that the effects of small and small farmers weathered the upheaval much better than the effects of common stock would rapidly appreciate in price, but there is something in the nature of humanity which forces men to turn to land, buildings, and

FREE TO ANY FARMER
The Royal Bank has booklets, prepared by competent authorities, on Farm Accounting, Livestock and Poultry. Many farmers have found these booklets helpful as well as interesting. The Bank will be glad to give you copies on request, free of charge.

WINNIPEG BRANCH: W. H. HUNTER, Manager
MONTREAL BRANCH: M. J. MCGILL, Manager

other real property in times of violent financial stress. Hence, look around you for a safe place to put your money. They are the "cyclone cells" of an unstable period. Canada occupies an excellent position in the world market for this year will prevent widespread unemployment, and the effects of the drought will be lessened. The history shows that farm seasons are usually the promoters of unneeded money.

Hon. Hugh Allen Explains Twine Situation

The following letter has been received by The Tribune from Hon. Hugh W. Allen, provincial Minister of Municipal Affairs:

It was rather surprising when it was brought to my attention through your paper and through personal letters that I received that there was a very considerable misunderstanding, and that the Dominion government was not to be held responsible for the twine situation. I am glad to hear that the Dominion government is not to be held responsible for the twine situation. I am glad to hear that the Dominion government is not to be held responsible for the twine situation.

In 1931 and 1932, owing to the difficult situation of many farmers in the Dominion, the Dominion government, in order to assist them, authorized the twine situation. Owing to the very low prices of twine, the Dominion government, in order to assist them, authorized the twine situation. Owing to the very low prices of twine, the Dominion government, in order to assist them, authorized the twine situation.

"When the Hon. Mr. Girdle and I visited the Peace River in 1931, just at the start of harvest in that part of the province, the question was raised as to the twine situation. I was held as to what, if any, assistance the Dominion government was going to give in providing twine. As it was in my constituency and naturally I was looking after local matters, I answered by announcing the policy of the Dominion government. We were in the district, however, harvesting got under way and it became apparent that the twine situation was not as serious as it had been in the past.

"The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past.

"The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past.

"The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past. The twine situation was not as serious as it had been in the past.

PACKAGE BEES IN OTTAWA DIST.
Results obtained for over eight years at the Bee Division, Dominion Experimental Farms, show very clearly that it is not at all profitable to purchase package bees for the purpose of increasing the yield of colonies under conditions existing in the Ottawa district. As in previous years, results obtained in 1933 from tests of Italian and Caucasian bees demonstrate that the Italian are equally as hardy as the Caucasian under the climatic conditions of the Ottawa district. In fact, they are superior as honey gatherers. A project to determine the most economical method of rearing bees was undertaken in 1933. The full season's work was completed in the fall of 1933. The results show that the Italian bees were found to be superior to the Caucasian bees in the matter of honey production. The Italian bees were found to be superior to the Caucasian bees in the matter of honey production.

LICENSERS FOR EXPORT OF HAY AND STRAW
According to information received by the Dominion Department of Agriculture, there is considerable misunderstanding, concerning the order-in-council recently issued whereby no person or firm is to export hay or straw without a license.

A highly speculative condition developed in Canada among hay buyers on their own account and on account of the Dominion government's action that has affected large areas in Canada and the United States, and the Dominion is this year considerably less than last year's. The order-in-council was issued whereby no person or firm is to export hay or straw without a license.

In 1931 and 1932, owing to the difficult situation of many farmers in the Dominion, the Dominion government, in order to assist them, authorized the twine situation. Owing to the very low prices of twine, the Dominion government, in order to assist them, authorized the twine situation. Owing to the very low prices of twine, the Dominion government, in order to assist them, authorized the twine situation.

GRAIN BURN LAMBS
The use of lucerne hay, either alfalfa or clover, is considered essential for success in lamb fattening. Grain burn lambs are a very common sight in the Dominion. The Dominion Department of Agriculture, Ottawa, has issued a brochure on fattening lambs. The brochure is available free of charge. The brochure is available free of charge.

CHEAMERY BUTTER AND FACTORY CHEESE PRODUCTION
The production of creamery butter in Canada in 1933 was the second largest in quantity in the history of the Dominion. The production of creamery butter in Canada in 1933 was the second largest in quantity in the history of the Dominion.

ILLUSTRATED NEWS OF THE WEEK - A SPECIAL TRIBUNE FEATURE

THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

PROMINENT DELEGATES TO THE GENERAL COUNCIL

At Kingston, Ontario, from September 12 to 22, the United Church of Canada held its sixth General Council, which was attended by 200 commissioners from all parts of the Church. Among the elected commissioners are the following (left to right): Rev. W. B. McIntosh of Vancouver, B.C., frontier home missionary; Mrs. J. C. MacDonald of Trinidad, B.W.I., wife of a frontier missionary; and Rev. Robert Roberts, D.D., Toronto, noted author and preacher.

NEW FIGHTING PLANE AMazes EXPERTS WITH WONDERFUL PERFORMANCE

The new British military airplane, provisionally called the Pterodactyl Mark V, was demonstrated at the Westland Aircraft Works recently, with great success. This strange craft is a two-center fighter, with a tractor airscrew driven by a Rolls Royce Goshawk engine of 600 horsepower. The engine sits just behind the pilot and a little below him at the extreme rear of the queer truncated body. In no other airplane, anywhere it is believed, has the engine so extensive a field of vision and of fire. Facing the rear, he commands an absolutely uninterrupted hemisphere looking forward, he can fire over the top of the plane. This picture shows the strange craft in flight.

RT. REV. W. C. WHITE

Following an appeal from Bishop White, who recently resigned as Bishop of Hsinan, China, the General Synod of the Church of England in Canada has granted independence to the diocese in the Far East.

A Few Items of World Interest

Found by England after six years as British high commissioner to Canada, Sir William Clark sailed from New York to Great Britain.

The British Columbia government will construct a new bridge across the Fraser River at New Westminster. Premier T. D. Pattullo has announced.

A new deal for soup-broth creators was declared when Robert Meece, commissioner of New York parks, announced that nine city parks, in addition to traditional Union Square, will be available for open-air meetings.

The general business outlook in Great Britain has brightened since June, Sir Josiah Stamp, well-known British economist and a director of the Bank of England, declared before members of the Aberdeen Chamber of Commerce.

An Irish Free State army aeroplane with three occupants crashed in the garden of Judge Meredith's home.

at Dublin. Lieutenant Arthur Russell and Private Twomey were burned to death; Sergeant Canavan jumped clear of the wreckage but was seriously injured.

With a view to developing a market in Japan for British Columbia sheep, the government has made a trial shipment of sheepskins for breeding purposes. Premier T. D. Pattullo said. The shipment was made by the Hutan Maru.

INFANTILE PARALYSIS VACCINE

Discovery of an apparently effective infantile paralysis vaccine was explained at a session of the American Public Health Association convention, Dr. Maurice Brodie, young Canadian research leader, formerly of Ottawa, Ontario, now connected with the New York City Health Department, described recent experiments with the poliovaccine vaccine which apparently has proved successful on a group of human volunteers, including Dr. William H. Park, head of the New York City Health Department research laboratory. Dr. Brodie himself and a number of children.

EMPEROR'S STATUE

Above is a photo of the one-sixth scale model of the statue of H. M. the King, which is to be erected at New Delhi, India, to mark the loyalty and attachment of the ruling princes and chiefs of India. The total height of the pedestal and statue will be 53 feet 3 inches, and the figure of His Majesty will be 18 feet 9 inches. It is hoped the unveiling will take place during the cool weather of 1935-36.

THE POOR FARMER NEVER GETS A BREAK

A farmer who was in the habit of grumbling about most things is reported by an exchange as saying to a neighbor that his potatoes are his this year.

"Well," said a neighbor, "I'm glad you're pleased with the size of your spuds."

"I dunno," said the grower, "what am I gonna do about little ones for the pigs?"

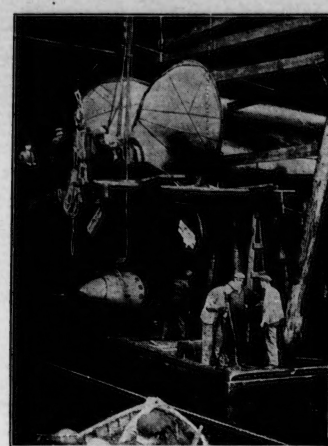

"What became of that bill the store sent us?"

"Oh, I sent it back marked insufficient funds."

THE COVETED TROPHY

Fred Perry, England's ranking tennis star and the world's No. 1 player, is pictured displaying his victory smile while holding the trophy emblematic of his title as U. S. tennis singles champion. Winner in 1933, Perry now has his name engraved twice on the mug. He intends to come back next year and retire the handsomely trophy.

GETTING READY FOR THE BIG DAY

This picture shows workmen firing the cone on one of the 35-ton propellers which will drive the new British liner, launched by Queen Mary on September 26 at Clyde Bank.

WELFARE EXECUTIVE

Miss N. H. Wark of Hamilton, who has been appointed senior official of the Ontario Department of Welfare.

SKIPPER OF MORRO CASTLE REACHES LAST REST

Coast guardsmen are shown at Ashbury Park N.Y., receiving by breeches buoy, from the charred wreckage of the liner Morro Castle, a box containing the ashes of Captain Robert Wilmont, commander of the ship, who died of acute indigestion a few hours before the boat caught fire, sending 100 persons to their graves. The blazing ship served as a funeral pyre for the dead captain.

HOME RUN KING

Here is a new and happy picture of Lou Gehrig, New York Yankees infielder, who surebats Babe Ruth as the Home Run King. Lou is on his way toward the 50 mark for the current season.

Check! or, the top floor guest who wrote "Just like home." in the hotel visitors' book. —The London Opinion.

Canadian Pacific Promotions

Official announcement has been made by Mr. E. W. Beatty, K.C., L.L.D., Chairman and President, Canadian Pacific Railway Company, of the approval of the directors of the company to the election of Mr. D. C. Coleman, vice-president, Western Lines, with headquarters at Winnipeg, to succeed the late Mr. Grant Hall as vice-president of the company at Montreal, and of the appointment of Mr. W. M. Neal, General Manager Western Lines, to the post of Vice-President, Western Lines, in succession to Mr. Coleman. Mr. H. J. Humphrey, General Manager, Eastern Lines, has been appointed Vice-President and General Manager Eastern Lines with headquarters in Montreal.

Picture layout shows Mr. Coleman (top) Mr. Neal (right) and Mr. Humphrey (left). They take over their new duties immediately.

My heart of content,
For friends that I want,
The way that I want.

THOUGHTS FOR THE WEEK-END

My bed full of sleep,
My heart of content,
For friends that I want,
The way that I want.

THOUGHTS FOR THE WEEK-END

My bed full of sleep,
My heart of content,
For friends that I want,
The way that I want.

THOUGHTS FOR THE WEEK-END

My bed full of sleep,
My heart of content,
For friends that I want,
The way that I want.

THOUGHTS FOR THE WEEK-END

My bed full of sleep,
My heart of content,
For friends that I want,
The way that I want.

THOUGHTS FOR THE WEEK-END

My bed full of sleep,
My heart of content,
For friends that I want,
The way that I want.

THOUGHTS FOR THE WEEK-END

My bed full of sleep,
My heart of content,
For friends that I want,
The way that I want.

Those who borrow really mean to return whatever is borrowed except for a new few—but the fact that they are forgetful and carelessness does not excuse the failure to return it. It is dishonesty, even if the intention originally was not so.

A wild west man has been discovered that can withstand drought. Wild oats, however, seem to require as much moisture as ever.

GARNERED BITS OF GRAIN AND CHAFF
